

Dear QAS Friends, ( Ernst, Juul, Maaike and Family and others)

Once again with great pleasure we write to you updating you a little about your most helpful donation. . As mentioned before we were able to donate 50 water filters, 50 filter units ,50 solar lamps and bought gasoline for the transportation.

You can see in these pictures people receiving their water filters and also in the right picture we have an elderly who received a filter unit. After about 14 months ( depending how many people use it) the filter needs a new unit.

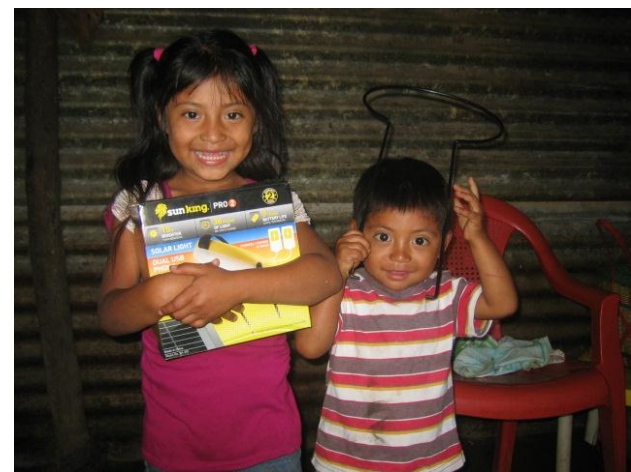

As you already know we continue improving health among the poorest, and having clean water in people's homes means a lot. It also helps them to avoid all the typical diseases mostly related to parasites and bacteria and now the whole family becomes healthier. It is a drastic positive change in people's life. We continue thinking this is the best way to purify water and the cost is considerable low. The taste of the water is also very good and it is always cool, therefore it has been much accepted everywhere. In addition it is easy to handle.

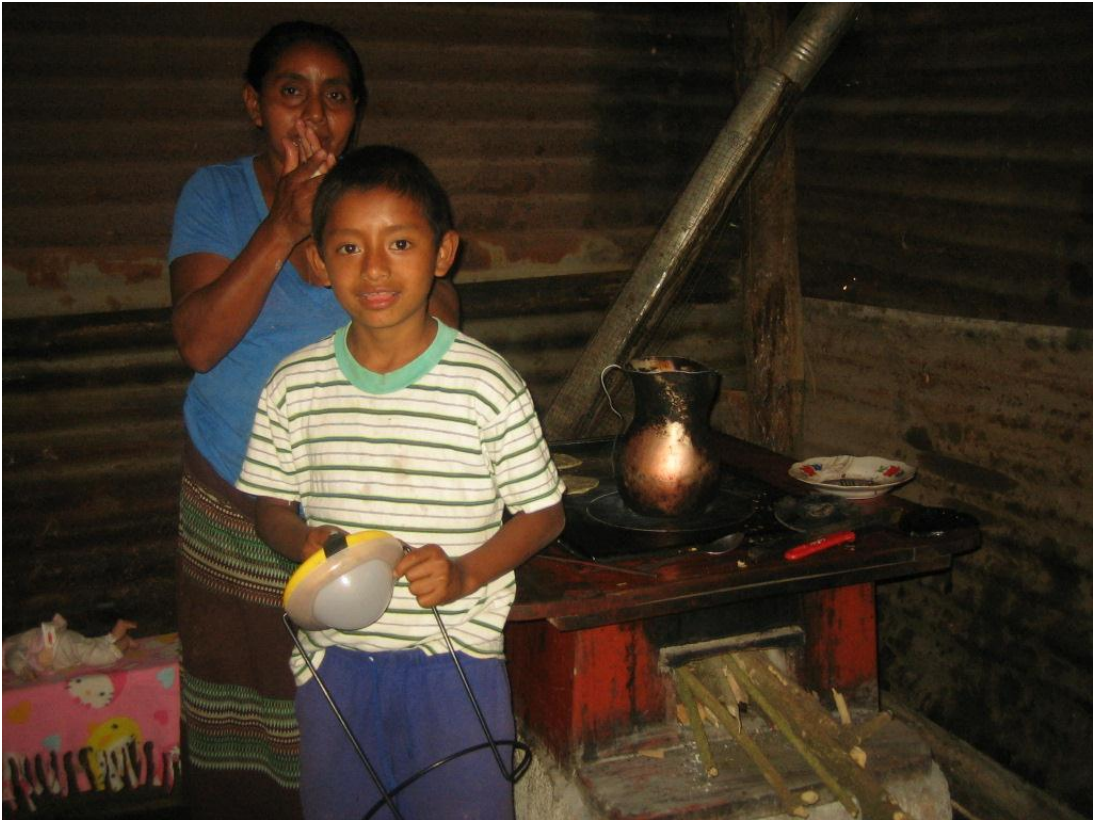

People around the villages are extremely happy to have their own water filters and are very thankful with you for your great support !!

Not only the people in the villages, but also the entire Vamos Adelante team are grateful with you for being so generous.

Coming up next you will see pictures of some happy people and their solar lamps .

Having light also makes a huge difference, especially in the rainy season where it often is totally black outside. If anybody in the family wants to use the latrine they reach it much safer-before many hurt themselves in the slippery mud in the dark. Studying is now possible at any time without that the electricity bill shoots up or that the family has to buy expensive candles. Children and adults find it very easy to use the lamp and also to charge it. Women who often get up around 2am in some villages to prepare the food for the husband and feel much safer having a light source close by.

Both solar lamps and water filters benefit the entire family. This is ridiculous and unthinkable that such as basic things like water and electricity (light) are unreachable for people in 2015, but sadly this is true and it is a shame that only a small group of people is able to reach this.

We are working hard every day and will continue doing our best to improve people's living

conditions. Without your trust and support this would not be possible. Once again in the behalf the benefited people and the whole Vamos Adelante team I want to say:

# THANK YOU!!!

If you want to know anything else or you have doubts and comments please send an email to Nina and we will be glad to answer you as soon as possible.

Ingrid and the Vamos Adelante team!
